

- Talked about model selection
- Talked about SQL connection
- Viewed Tighe's Tableau visualizations
- Decided we will create an enter box so someone could enter values and get a prediction of >4799 or <4799
- Update with Nick and Carley: approved model, suggested that we look at random forest model examples to weight features of the model, suggested that we look at our finalWorth >4799 and finalWorth <4799 categories more in depth
- Talked more about striving for a javascript webpage for dashboard
- We will meet on sunday 2/12 for tableau and javascript discussion
