

- We decided who will own the tableau dashboard
 - Tighe will add the visualizations he already made, any others we suggest, and any edits we suggest
- We strategized what a javascript webpage could look like. Sarah will create a rough template and pass it off to be completed
- Talked about adding the model descriptions to the readme. Sean and sarah will split the descriptions
- Continuing to edit the readme to be in a finished state
- Thursday meeting will finalize the javascript dashboard design/ content make up
- Tuesday meeting will be all about the presentation and slides
- We updated the model file to include formatting, made fixes
- We updated the SQL files to get the labeled info in the database

Any tableau visualizations we haven't added yet? - decided to look at demographics between >4799 and <4799 billionaires:

- Created a labeled, cleaned csv file that includes the >4799 binary column and uploaded to README
